## Profile

Upcoming university graduate eager to implement and further develop technical skills acquired through higher education. Seeking employment in software engineering or a related field, with ambitions to grow within the company laterally and/or vertically. Highly motivated by both the systematic and creative problem-solving, as well as the detail-oriented troubleshooting, that is inherent to software engineering.

---

## Work Experience

### Front-end Web Developer Broadway Jewelers July - September 2021

- Created a professional, user-friendly website in Visual Studio Code using HTML and CSS for Broadway Jewelers, a multi-million dollar company.
- Utilized JavaScript to incorporate stylized and manipulable elements for patron inputs, such as product preferences and payment methods, to be directly transmitted to company servers for order completion.
- Tracked website usage and metrics for the company and compiled data into easy-to-follow summaries using Excel.

### Manager & Team Leader Broadway Jewelers May - June 2022

- Led a small team in conducting business within the main store as well as around New York City's 47th Street 'Diamond District'.
  - Communicated to distribute tasks to employees to carry out throughout the day and met with distributors and sellers.
  - Used detail-oriented thinking to manage finances along with inventory to keep the business running smoothly and efficiently.
-
